

RAG Test Question & Answer Document

Q1: What is FastAPI?

A1: FastAPI is a Python framework.

Q2: Why is it used?

A2: FastAPI is used to build APIs quickly and efficiently. It provides high performance, automatic data validation, and automatic API documentation.

Q3: What is RAG?

A3: RAG stands for Retrieval-Augmented Generation. It combines information retrieval with a language model to generate accurate answers based on external documents.

Q4: Why is RAG useful?

A4: RAG helps reduce hallucinations by retrieving relevant information from documents before generating an answer.
